

# ACADEMIC CERTIFICATE PROGRAMS

## Plumbing Systems Design Certificate Program

Plumbing systems are one of the most important and vital parts of an overall building design. Through this 1-year course of study, an individual will gain an understanding of the basic and advanced principles and code requirements of typical plumbing systems and the ability to design and review plumbing systems. Targeted Students: Engineers

## Plumbing Construction Management Certificate Program

Construction managers coordinate and supervise the work at construction sites from early start to final stop. Through this 1-year course of study, an individual will gain an understanding of the basic principles of managing code-compliant construction projects; an understanding of the basic principles and code requirements of typical plumbing systems and the ability to review plumbing systems. Targeted Students: Contractors, Construction Managers and Supervisors.

## Plumbing Technology Certificate Program

The Plumbing Technology program is a comprehensive two-year program designed to provide individuals with the skills to apply a broad range of plumbing principles. Through this course of study, an individual will learn how to install, repair and maintain a variety of piping systems, plumbing fixtures and other equipment generally associated with water distribution and wastewater disposal; and learn the basic principles and code requirements of typical plumbing systems. Targeted Students: Plumbing systems Installers and Repairers.
